Re: Sewer System Emergency Contact Procedure

Dear Mark,

As you know, U.S. Filter (USF) is contracted by the town to operate the sewage system.

The purpose of this letter is to request that you provide USF's 24/7 phone beeper number to town departments that would be involved in emergency street openings, for example emergency gas or water street excavations. It is important in such cases that the town department notifies USF in order that potential damage to the sewer system be avoided.

Similarly, would you advise the Fire and Police and 911 Operators of USF's 24/7 beeper in case townspeople call in during off-hours with individual sewer problems.

U.S. Filter 24/7 Beeper

781 456 7041

Thank you for your assistance.

Sincerely yours,
Sewer Commission

Gary Vanderweil, PE
Chairman
